

The key to Edivote™ Pro is simplicity (as easy as 1, 2, 3)

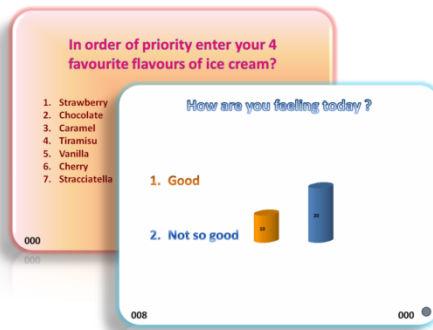

Edivote™ Pro has all the capabilities of the standard Edivote™ but also provides additional functionality designed for regular users who require more than just the basics.

The main additions are:

Comparisons, Ranking, Scoring and a more enhanced reporting ability.

EdiVote™ Pro also gives the user a greater choice of slide types (vertical, horizontal, pie chart, vertical bars, horizontal bars, score board, moment to moment). Individual bars can be placed where ever you wish to show them on the slide. All the features of Microsoft® PowerPoint® 2007 are usable by converting the EdiVote™ Pro slide which gives more opportunities to design your slide or the whole show.

EdiVote™ Pro also offers a Roster function to enable individual tracking as and when required.

Overview

- Multiple Bases.

The key to Edivote™ Pro is simplicity (as easy as 1, 2, 3)

EdiVote™ Pro Features

- MS Graph Slides**
 EdiVote™ Pro supports the standard Microsoft® Graph Slides in Office 2003, 2007 and Office 2010.
- Non MS Graph Slides**
 The Non- MS Graph slide Templates for EdiVote™ Pro, enable the user to use the full graphical capability of Office 2007 and 2010
- Scoreboards**
 The Scoreboard slide collects scores from all game slides that belong to your current Session. It is possible to collect scores per team, per person or according to one of the demographic groupings used in your presentation.

EdiVote™ Pro Special Features

- Comparative Data**
 Comparative data enables the audience to compare earlier voting results with actual results (e.g. before and after session)
- Cross Tabulation (Demographics)**
 Allows the splitting of the results from a question to predefined demographics and to display it to the audience in real time.
- Games**
 Set scores and colours to your game slides, to perform quizzes with your audience
- Ranking**
 The audience is able to rank different items. In the slide properties you can set weights which are distributed according to the voted position
- Extras**
 With EdiVote™ Pro the facilitator is able to set various extra shapes on a slide (e.g. average, correct answer, number of non-voters and much more...)
- Roster**
 The roster allows the facilitator to predefine the audience setup as groups or teams, e.g. gender, business unit and several other options
- Reports**
 EdiVote™ Pro provide a report based on Microsoft® EXCEL, which includes all known types of Reporting (e.g. Demographic Report, Ranking Report, Individual Feedback Report, Competition Report)
 The User is able to create the report directly after the session as well as create a report from an old Session
